

SPACE RENAISSANCE 4 ALL

We have developed a space payload to celebrate the values and goals of SRI, LUNEX EMMESI and partners. It is using spares from ISS Expose astrobiology trays from 2009-2010, contains a Tribute to 40 partners of Space SDG18 and LUNEX, Science samples from NASA Ames, Universities Artscience pieces from ArtMoonMars, MoonGallery, MoonMars Museum, SRI Digital library of documents, images and music. The SR4AG was assembled in LUNEX/SRI NL for delivery on 4 Dec in LUX to The Exploration Company and Integration in Nyx capsule for "Mission Possible" launch June 2025 with Space X from Florida.

MISSION POSSIBLE - 2025 NYX CARGO

If we democratize space exploration, can we unleash the potential of space for humanity's future? The Exploration Company is a German-French company headquartered in Munich, Germany. Its mission is to democratize space exploration, making it affordable, accessible and sustainable. To realize this mission, the company is building and operating reusable space capsules called Nyx. These orbital vehicles can transport cargo and supplies, and eventually, personnel.

SPACE RENAISSANCE 4 ALL

The Space Renaissance for All Gallery carries samples from partners that collaborated with EuroMoonMars, also science, cultural and artefacts supporting Space4All SDG18 initiative. The payload uses a sub-tray spare from EXPOSE-R astrobiology payload sent to ISS International Space Station (2009-2011). Each sample fits within a cylinder slot of 10 mm diameter by 8 mm depth.

SRI is promoting space as SDG18, together with 110 institutions. The SR4ALL project team includes director/curator Prof Bernard Foing (president SRI CEO LUNEX EMMESI), Heather Smith (NASA Ames), Marieke Feenstra and Johanna Nyqvist (MoonMars Museum), Mary Kuiper, Eanna Doyle (Space4All ArtMoonMars), assisted by Adriano Autino, Sabine Heinz (SRI vice-presidents), Frank Molster, Boudewijn Kuipers, Frans Folst (LIS) and partners. 40 Organisations with artefacts/logs on glass disks in lower tray.

A, B, C

Space4All ArtMoonMars artists (Eanna Doyle, Eva Petric's Earthling, Brigitte Havan)

D) Ageha/Swallowtail (by Jun Sato Ruta Stankeviciute, Tokyo)

F) MoonGallery artists (including Mary Kuiper + Eva Petric + Bernard Foing)

G, H, I, J

MoonMars Museum artists (Marieke Feenstra + Johanna Nyqvist) G/1 - NanoFiche Disc with MoonMars Museum Mare Crisium exhibition H/2 - Quartz Disc with artwork Cave painting Chauvet Ark of Noah (Johanna Nyqvist/B Foing) - plus digital 5D printed artworks MoonMars Museum and Chauvet Caves France by Peter Kazansky Sphotonix I/3 - Printoptix - 3D printed Fallen Astronaut / Mary Kuiper / Micha Klein / MoonMars Box / MoonMars Metaverse Museum / Rocket Printoptix art J/4 Moonstone - MoonMars Museum

K, L, M

SRI artsScientists (including Sabine Heinz, Danielle Futselaar, Caroline Gueye, Irene Schlacht, Adriano Autino's music) N) ArtEO artists (3 artefacts in ArtEO miniature 3D-printed cell) Ravi Kapur's Imperative Space
